**Remixed** the original large Pinecil case to be printed in multiple parts/materials. Reason: because it looks good.;

Tolerance between the outer and inner parts is 0.1 so it should fit nice. Glue the inner to the outer parts. Be sure to put glue at the hinge and clip locations.

The other parts can be downloaded from the original design page.

Also check my new **remix** that is more rugged.

**Update:**

**20/12/22**

Removed a redundant storage compartment to fit a bigger cable compartment. It should comfortably hold the 1.5m silicone usb c cable now. I haven't tested it with a longer cable. Also, check out [orax's remix](#) with a different layout and enlarged cable storage compartment.

**28/12/2022**

Uploaded a remixed version of the TS100 insert. I've not printed it yet so please send me a message if there any problems with it. The top inserts are all compatible as the tips of both Pinecil and TS100 are the same.

## This remix is based on

**TS100, Pinecil, TS80 & TS80p Case with options, Stand, Solder Reel, Storage, TS-100 Box TS 100 Holder**

by Termiman
